To Whom it May Concern,

Please find attached my remarks delivered to the Saskatchewan Rate Review Panel on April 6th at the Double Tree in Regina.

To summarize, I urged the panel to reject the proposed 8% Sask Power rate increase. This hike would create an irresponsible and unsustainable demand on Saskatchewan people at a time when businesses are struggling and households are facing record-high inflation and cost of living pressures. Furthermore, I called on the Crown Investments Corporation to introduce a moratorium on Sask Power dividend payments until the current challenges facing our Province's power generation, transmission and distribution systems are addressed.

Sincerely,

Aleana Young  
MLA Regina University  
Deputy House Leader - NDP Caucus  
Critic for Economy and Jobs, Immigration, Trade & Export Development, Sask Builds, Central Services, Saskatchewan Government Insurance and Sask Power
