

2016 and 2017 RATE APPLICATION  
SIECA FOLLOW-UP QUESTIONS

**SIECA Q2 SUPPLEMENTARY 1:**

In its response to SIECA's Question #2, SaskPower provided 2015 hourly customer class usage data for the following customer classes: Residential, Commercial, Farm, Oilfield, Power and Resellers.

The customer class designations in SaskPower's response are not consistent with that shown in Schedule 4.0 of SaskPower's 2017 Fiscal Test Embedded Cost of Service Study (COSS) which shows the following customer classes: Urban Residential, Rural Residential, Farms, Urban Commercial, Rural Commercial, Power-Published Rates, Power- Contract Rates, Oilfields, Streetlights, and Reseller.

Please provide an Excel spreadsheet showing the 2015 hourly power consumption of each customer class identified in Schedule 4.0 of the COSS.

If the data requested is not available, please explain how the 2015 hourly usage data provided in response to SIECA Question #2 can be allocated to conform to the customer classes identified in Schedule 4.0 of the COSS.

**Response:**

SaskPower cannot provide an Excel spreadsheet showing the 2015 hourly power consumption of each customer class identified in Schedule 4.0 of the COSS as the information in that format does not exist.

The data cannot be conformed to match the customer classes in Schedule 4.0 of the COSS. The data is used for other purposes and is not utilized to allocate costs within SaskPower's cost of service.
